About me

Currently in my third year of interactive media design studies, which I will complete in July 2027, I am passionate about creating visual and digital experiences that combine aesthetics, user understanding, and innovation. I have developed an approach that blends **creativity**, **technical precision**, and **curiosity**, driven by a constant desire to learn, experiment, and collaborate on meaningful projects.

19.05.2001

French (native)
English (B2)
